ABOUT US

The world's largest manufacturer* of motorcycle helmets celebrating its 50th anniversary presents its latest SMK Helmets range — a collection of feature-rich, modern and stylish helmets for urban commuters and adventure riders. Our 2023 collection of SMK helmets has been developed for safety, comfort and style utilising the most innovative and technologically advanced products while paying attention to the finest details.

50 years of helmet manufacturing experience combined by our passion for riding helps us understand the unique needs of our riders. Our helmet designers are strategically located across the globe and therefore understand the requirements of different local markets and unique riding conditions.

SMK helmets are being sold in markets across the world and we have established a solid reputation for consistently providing premium quality helmets. Our factories are located in Faridabad, India (40 Kms from New Delhi airport) where we have a production capacity of fourteen million helmets annually. Our Company boasts of four state-of-the-art manufacturing facilities over an area of 70,000 square meters with 2800 dedicated employees, that handle all necessary production processes including moulding of EPS shells, injected shells and components, painting and assembly. In addition to having our own cutting-edge in-house mould shop & design facilities, we have our own inhouse testing laboratory allowing us to test for all local markets and in accordance with international homologations. Our manufacturing facilities and processes have control over the complete production cycle that allows us to bring you consistent quality and exceptional style.

TCR 291N

RANGE

COLORS

BLACK

	Carbon fiber		Quick Release Strap: For maximum ease of releasing the strap under the chin
	PFT Premium Fiber Technology		Reinforced Strap: Prevents breakage of strap, providing maximum protection during any unfortunate impact
	EIRT Energy Impact Resistant Thermoplastic		Removable Washable Liner: Ability to remove and clean the liners for maintaining freshness over time
	1 Shell - 2 Shells		Neck Roll: Additional comfort padding for neck which is removable and washable
	Multi Density EPS: Provides maximum all-round head protection during any unfortunate impact		Antistatic Moisture Controlled Fabric: Absorbs and evaporates sweat faster from riders face, increasing comfort during extended usage
	Top Air Vents: Provides rider with fresh air while riding, aiding rider comfort		Breathable Liner: Breathability causes more air flow inside the helmet liner and as a result faster evaporation of sweat in the helmet liner
	Chin Air Vents: Air intakes on the chinguard of the helmet for increased air flow on the rider's face while riding, aiding to rider's comfort		ECE Certified: Internationally accepted, Maximum head injury protection during impact
	Hot Air Exhaust: Helps in directing hot air within the helmet outwards for rider comfort during extended usage		P/J Certified: Dual certification of the helmet providing maximum safety while riding with the helmet as an open face or full face helmet
	Channeled Exhausts: Movement of air through the liners provides maximum comfort to the rider during extended usage		Emergency removable cheek pads: In the event of any unfortunate incident, cheekpads can be removed quickly for easy and safe removal of helmet, protecting rider from further injury
	UV Resistant Shield: Specially coated shield prevents UV degradation/fading, maintaining visibility over time		Hypoallergenic Liner: Protects rider from allergies or infections arising from continuous contact with damp helmet liners due to extended riding or on hot/rainy days
	Scratch Resistant Shield: Protective layer coated for preventing scratches on shield during regular use, maintaining visibility and safety		DOT Certified: This stands for "Department of Transportation," but the standard is FMVSS 218, the Federal Motor Vehicle Safety Standard #218, Motorcycle Helmets, and it is applicable to helmets sold in the U.S. for on-road use. DOT certification, is the legal minimum standard that helmets must pass in the United States.
	Quick Release Shield: Convenient to the rider for easier changing shield when required		
	Pinlock Antifog: Patented Pinlock technology for prevention of shield fogging during riding in cold and humid weather		
	Internal Sun Visor: Retractable visor, reduces the sun's glare without replacing visors providing safety and comfort while riding		
	Breath Deflector: Deflects moist air, due to breath, away from shield, maintaining rider visibility		
	Wind Protector: Protects the rider from cold air while riding, helping the rider's comfort and reducing noise		

FMVSS 218 sets standards in three areas of helmet performance: impact attenuation, basically energy absorption; penetration resistance; and finally the retention system effectiveness, and there are new product labeling requirements.
